

About the AAISM Exam

Chapter 00 · Episode 1 — Dr. Michael Solomon

Your Orientation

1. What the certification is
2. What the exam looks like
3. What it can do for your career

What is AAISM?

Practitioner-level credential
Audit, risk & governance pros
AI meets enterprise security
Not purely technical

THE LENS

A risk & control perspective
Evaluate, govern & audit AI
Not build it

AAISM

Advanced in AI Security Management

An ISACA Credential

AUDIT
CISA

SECURITY
CISM

RISK
CRISC

AI
AAISM

WHAT IT COVERS

- Assess risk
- Evaluate controls
- Interpret frameworks
- Advise leadership

WHO IT'S FOR

Internal auditors
IT risk professionals
Security managers
Compliance officers
Consultants

WHAT IT TESTS

- How AI introduces risk
- Evaluating controls over AI
- Applying audit & governance frameworks

Built on ISACA Principles

Control objectives

Audit evidence

Risk assessment

Governance oversight

From Frameworks to AI Domains

COBIT + IT Audit Framework

AI risk identification

Algorithm audit techniques

Data governance & compliance for AI

IF YOU HOLD CISA / CISM

The methodology is familiar

New = AI-specific risk & control vocabulary

THE PRESSURE

Boards are asking audit committees
Regulators in the EU, UK & US
Documented AI governance now expected

The exam structure

Domains & question counts

How to prepare

The AAIISM Exam

Chapter 00 · Episode 2 — Format · Domains · Scoring

EXAM LOGISTICS

Scenario-based, multiple choice

Authorized test center or online proctor

2.5 hours, scenario-based

90 Questions - 150 minutes

Passing Score: 450 / 800

ISACA scaled scoring

TESTS JUDGMENT, NOT RECALL

Apply principles to real situations

What should the auditor do?

Three Exam Domains

D1 · Governance & Program Mgmt — 31%

D2 · Risk & Opportunity Mgmt — 31%

D3 · Technologies & Controls — 38%

DOMAIN 1 • 31%

Governance & program management

Frameworks, roles, accountability

Strategic alignment

DOMAIN 2 • 31%

Risk & opportunity management

AI-specific risk ID, assessment, treatment

Differs from traditional IT risk

DOMAIN 3 · 38% (heaviest)

Technologies & controls

Data quality, model validation, access

Monitoring & bias management

Three Recurring Patterns

The best first step — sequence & priority

The primary risk — most significant

The most effective control — root cause

PREREQUISITE

CISA or CISSP required

IT audit / risk / governance experience

Infosec / compliance background helps

HOW TO REGISTER

Create an account at isaca.org

Buy the voucher, schedule the exam

Members get a discounted fee

What AAIISM Does for Your Career

Chapter 00 · Episode 3 — Professional Value

THE MARKET GAP

AI is outpacing governance

Boards want assurance

Teams lack the vocabulary

HOW AAISM HELPS

Defensible, ISACA-backed credential

Evaluate AI by risk & control

The gap is widening, not closing

Most Impact In Four Contexts

SCOPE→AI
Internal audit

ENGAGE
External audit & consulting

RISK REG
IT risk & compliance

GOV LAYER
Security management

WHERE IT LANDS

Risk & compliance — credible vocabulary

Consulting — a differentiator

Security — the governance layer

What AAIISM Signals

AI risk in governance terms

A structured, replicable method

A commitment to staying current

Three Habits to Build

Think like an auditor, not a technician

Connect concepts to scenarios

Use ISACA frameworks as anchors
