About the AAISM Exam

Chapter 00 · Episode 1 — Dr. Michael Solomon

Your Orientation

1. What the certification is
2. What the exam looks like
3. What it can do for your career

What is AAISM?

Practitioner-level credential

Audit, risk & governance pros

AI meets enterprise security

Not purely technical

THE LENS

A risk & control perspective

Evaluate, govern & audit AI

Not build it

AAISM

Advanced in AI Security Management

An ISACA Credential

AUDIT
CISA

SECURITY
CISM

RISK
CRISC

AI
AAISM

https://www.isaca.org/credentialing/credentialing-badges

WHAT IT COVERS

Assess risk

Evaluate controls

Interpret frameworks

Advise leadership

WHO IT'S FOR

Internal auditors
IT risk professionals
Security managers
Compliance officers
Consultants

WHAT IT TESTS

How AI introduces risk

Evaluating controls over AI

Applying audit & governance frameworks

Built on ISACA Principles

Control objectives

Audit evidence

Risk assessment

Governance oversight

From Frameworks to AI Domains

COBIT + IT Audit Framework

AI risk identification

Algorithm audit techniques

Data governance & compliance for AI

IF YOU HOLD CISA / CISM

The methodology is familiar

New = AI-specific risk & control vocabulary

THE PRESSURE

Boards are asking audit committees

Regulators in the EU, UK & US

Documented AI governance now expected

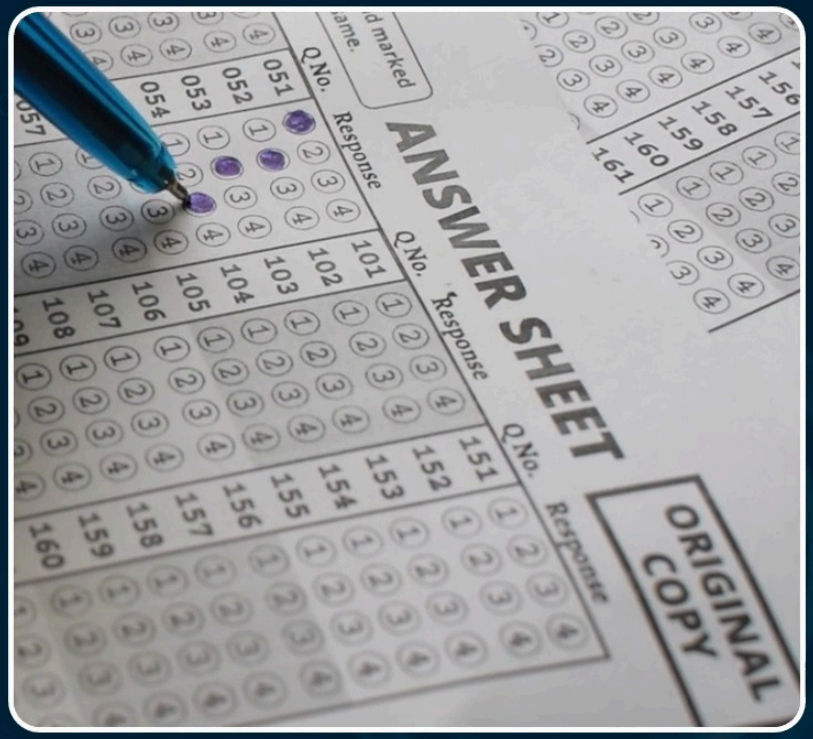

The AAISM Exam

Chapter 00 · Episode 2 — Format · Domains · Scoring

EXAM LOGISTICS

Scenario-based, multiple choice

Authorized test center or online proctor

2.5 hours, scenario-based

90 Questions - 150 minutes

Passing Score: 450 / 800

ISACA scaled scoring

TESTS JUDGMENT, NOT RECALL

Apply principles to real situations

What should the auditor do?

DOMAIN 1 · 31%

Governance & program management

Frameworks, roles, accountability

Strategic alignment

DOMAIN 2 · 31%

Risk & opportunity management

AI-specific risk ID, assessment, treatment

Differs from traditional IT risk

DOMAIN 3 · 38% (heaviest)

Technologies & controls

Data quality, model validation, access

Monitoring & bias management

Three Recurring Patterns

The best first step — sequence & priority

The primary risk — most significant

The most effective control — root cause

PREREQUISITE

CISA or CISSP required

IT audit / risk / governance experience

Infosec / compliance background helps

HOW TO REGISTER

Create an account at isaca.org

Buy the voucher, schedule the exam

Members get a discounted fee

What AAISM Does for Your Career

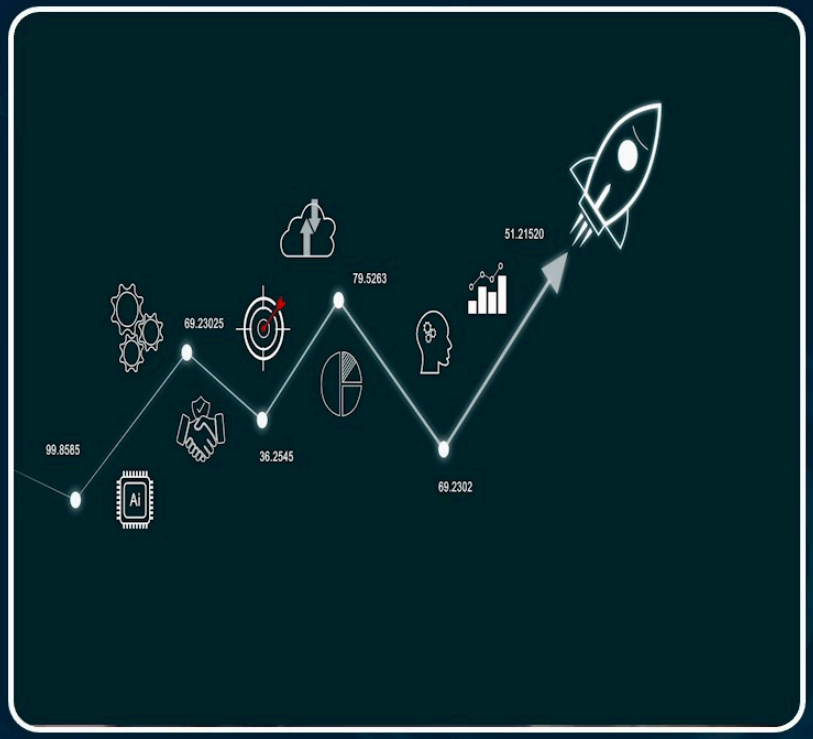

Chapter 00 · Episode 3 — Professional Value

THE MARKET GAP

AI is outpacing governance

Boards want assurance

Teams lack the vocabulary

HOW AAISM HELPS

Defensible, ISACA-backed credential

Evaluate AI by risk & control

The gap is widening, not closing

WHERE IT LANDS

Risk & compliance — credible vocabulary

Consulting — a differentiator

Security — the governance layer

What AAISM Signals

AI risk in governance terms

A structured, replicable method

A commitment to staying current

Three Habits to Build

Think like an auditor, not a technician

Connect concepts to scenarios

Use ISACA frameworks as anchors

YOUR ANCHORS
